## Wolgan Road temporary works

### April 2026

Minor works will be undertaken along the closed section of Wolgan Road from 14 April 2026 for up to four weeks.

These works are being carried out by Gracey and Son Earthmoving in advance of a future work package that will enable the temporary reopening of Wolgan Road to residents.

The works will include clearing debris from culverts, V-drains and drainage pits, inspecting culverts using CCTV to check their condition, and upgrading drainage grates to help reduce future blockages.

Three small trees (one eucalypt and two acacias) will be removed to improve safety, and all areas will be fully cleaned up once works are finished.

Traffic control will be in place, though residents are advised to continue using the Donkey Steps for access in and out of the Valley during this time. We will keep the community informed as the works progress.
