Dear Mr Faulkner

RE: Suggestions for Drought Relief Funds

At our last meeting the possibilities for the funds for Drought Relief were discussed and the most popular suggestions were as follows:

A pipeline from Marrangaroo to Wallerawang to link us up with Lithgow water to take advantage of the Clarence Colliery water transfer scheme so that we no longer need to use the Fish River water supply.

A water aerator for Lake Wallace for the health of the fish and help minimise the blue green algae.

A footpath from Wallerawang School to Forest Ridge Road to allow for foot and bike traffic to be safe along this stretch of road, which we have been requesting for a lot of years.

Regards

A handwritten signature in cursive script that reads "Roslyn Francis".
