ALTERNATE FUEL REBATES

Version 1

5. COMPLIANCE

5.7 ALTERNATE FUEL REBATES

OBJECTIVE: To provide a process for providing rebates to eligible residents for the replacement of coal fired appliances with an alternate cleaner heating system.

POLICY:

1. AIM

To provide a clear process for eligible properties with a **coal** burning appliance to receive a rebate for the replacement of the appliance with a cleaner alternative, with the aim of improving air quality in urban areas of the local government area.

2. Location

To be eligible for the Alternative Fuel Rebate the property must be zoned residential R1-5 or RU5 with land area ≤ 2 hectares and be within a town or village in the Lithgow Local Government Area.

3. Appliance

Appliance is a coal fire heater that heats water &/or heating of a residence and is currently used/in use for that purpose. An open fireplace is not considered an appliance for the purpose of this policy.

4. Definition of Boiler

A water-heating system for domestic use, consisting of a drum of water mounted above a fire. A boiler is a closed vessel in which fluid (generally water) is heated. The heated or vaporized fluid exits the boiler for use in various processes or heating applications, including water heating, central heating, boiler-based power generation, cooking, and sanitation.

5. Eligible systems

- To be eligible applicants must submit a completed Application for Alternative Fuel Rebate Form (Attachment 1)
- The rebate is only available for the replacement of a coal burning appliance
- All coal burning appliances must be removed from the property
- A property is only eligible to one rebate regardless of the number of appliances removed
- Before removal of the appliance Council must inspect the system to determine if it qualifies for the rebate, photos will be taken for Council records

6. Removal

Coal burning appliances must still be installed to be eligible for the rebate. If you have already replaced or are in the process of replacing an eligible coal fired appliance, you are not eligible for a rebate.

The Coal burning Appliance must be removed and the receipt of disposal for metal recycling is to be provided by the applicant or authorised installer to Council.

7. Installation

- Replacement of the coal burning appliance must be with an electric, flued gas or alternative approved heating appliance
- A new system can be installed up to 6 months before or after the removal of the coal burning appliance
- Replacement systems must be installed and operated in accordance with relevant Australian Standards, Building Codes, Local Government Requirements and manufacturer's specifications
- Council will inspect & take photos of the replacement system in place prior to the approval of the rebate

8. Rebate

- If Council determines the application is approved for the rebate, domestic household will receive \$1000 and a pensioner \$1400¹
- Pensioners must provide a Pension Card Number
- Payment to made within a reasonable time frame
