

Systems may vary to suit each Water Supply Authority

100mm Cam lock outlet or 75mm Cam lock outlet & 25mm T tap outlet

50mm Cam lock outlet 25mm T tap outlet

25mm T tap

80mm Cam lock

Follow instructions on the cabinet. Procedures must be in order & there are time-outs between each function.

Payment Methods

Credit Card or Debit cards by Visa & MasterCard are accepted, including Debit Cards from Australia Post & most banks, as these are based upon Visa or MasterCard.

Account Cards are for regular Users, where the Supply Authority issues accounts for water taken, usually monthly & usually limited to commercial tanker drivers. Commercial operators often use Corporate Credit Cards instead of Account Cards.

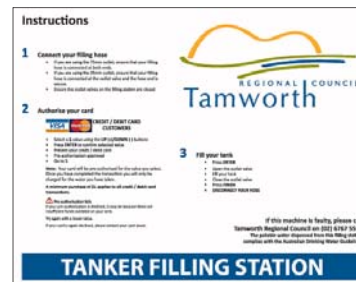

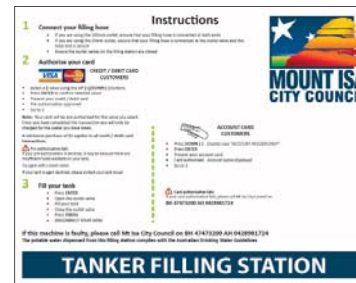

Credit Cards are operated by Tap or Card insertion, the magnetic card swipe is no longer used. Account Cards are by Tap only.

Credit Card transactions are limited to \$99.00, being the maximum that does not require a PIN (personal identification number), or a receipt.

Typical Instructions

Using a Credit Card & Account Card

Using Credit Card Only

Screen Messages

There are 2 screens, the customer screen & the Credit Card screen.

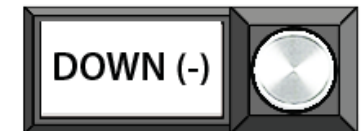

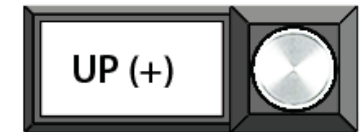

Instructions ▼ Amount of water for the set dollar value

Cost of Water ▲ Minimum Charge usually \$1.00

Operation

Follow the instructions

- The filling hose should be connected first. If card usage is approved before the hose is fitted the Filling Station may time out & the card will need to be processed again.
- A pre-authorisation of the card is required to confirm the available credit, before issuing water.
- Use the UP & DOWN button to select the amount of water needed (or any amount in excess). Users will only be charged for the water delivered, the pre-authorisation is only to confirm that the card has credit.
- **Only** for tanker drivers with Account Cards, just press the DOWN button once & the main display says Account Cards Only. This speeds up the setting of large amounts of water.

Screen says

pg 6

Instructions ▼ Amount of water set

Cost of Water ▲ Charge for set amount of water

- Press ENTER to confirm this pre-authorisation.
Note: if the enter is not pressed or the FINISH/CANCEL button is pressed instead, then the charge that has been set will be applied to the users Credit Card, until the bank reverse the transaction. The time taken for the users bank to reverse the transaction is bank controlled & can take minutes, or many hours.

Screen Says ▼ Increments as water is taken

▲ Increments as water is taken

Water will now be available.

- Fill Tank & when finished press FINISH.
Note: Filling Stations protect against misuse with a number of time outs.

pg 7

Once the pre-approval has been confirmed water can be taken immediately but flow should commence within 1 minute (or as the Supply Authority nominate). If longer then the Filling Station completes the transaction automatically. The same happens if the water delivery is interrupted during filling, for more than 1 minute.

Screen says ▼ Amount of water taken

▲ The amount to be charged to the Credit / Debit Card

- Turn OFF the taps.

Service Difficulties

There should be a service difficulties telephone number in case of need.

Before calling please take time to review the instructions & check for User error as the Filling Station is remarkably reliable & has built-in protections for most misuse of problems experienced.

This equipment is Australian made, by Australians, for Australians

Abberfield Technology is **privately owned by committed Australians who believe Water is an essential service** & should be readily available to all.
